RUSSIAN INDUSTRY STANDARDS

CATALOG

PUBLICATIONS
TRANSLATED INTO ENGLISH

MasterFormat™
COMPATIBLE

Contents

This catalog contains SNIP publications available in English. The list of publications is arranged in alphabetical order within each group. Group indexing is based on the industry-accepted 16 division format for data filing and construction specifications, and compatible with Construction Specifications Institute's MasterFormat. This classification system is different from International Classification for Standards (ICS) used for catalogs of international, regional, and national standards. To help you relate Russian national building codes to corresponding model regulatory construction codes (such as BOCA or Uniform Building Code), we modified last two digits within the 01400 series to reflect model code chapters. For example, 01428 (Mechanical Systems) corresponds with Chapter 28 (Mechanical Systems) of the model code.

How to Order

! Each document in this catalog is identified by a unique Locator Code (see "How to Read Records in This Catalog" below). A single document, also called "title", can be published in different formats including prints, CDs, Internet, etc. To identify individual publications of a document, we are using International Standard Book Numbering system (ISBN). Locator Code and ISBN help us locate a document in our database in exact format and language. When ordering, please include the appropriate Locator Code.
